León Domingo

Developer

Curious developer and enthusiast of the WWW universe, looking for a company's "mission/vision" (what they're trying to achieve and for whom) and culture (what they think about their people) I can feel aligned with.

I'm in love with open-source projects which give us a great platform to create useful things with a low cost and full transparency. (Almost) every tool I use is open source (Linux, Python, VSCode, PostgreSQL, and so on) and I (usually) do not like propietary solutions (Oracle, SQL Server, Windows, etc) because of the obligation to adopt another set of private related technologies from the same company (most of the time).

I'm pretty focused on JavaScript-related technologies (including Typescript):

React or

Vue for the front, and Node/Express for the backend.

I love **Python** and the whole living ecosystem around it. Great work of a lot of people. Great on-line resources and awesome productivity.

Testing (and playing with) new technologies, as they come up, is something I like a lot.
